SUMMARY

Backend Developer and UP Diliman Computer Science graduate. Builds production APIs, microservices, and ServiceNow automation in Node.js, Express, and Ruby on Rails. At Supergene, designed Facebook Instant Games APIs that held state for millions of daily active users. 2024–2026 was certification and study — not a full-time role. Open to backend and ServiceNow work.

Certification & study

2024 – 2026

- ServiceNow CSA (Apr 2026) and Ruby on Rails (Aug 2026)
- Independent work in Node.js, Express, NestJS, and PostgreSQL, including the portfolio at davin-solano-cv.grok.me
- Looking for the next backend or ServiceNow seat
